

# Fundamentals of Dentistry

 **Thursday 16th April 2020**

## Course Description

Part of the Fundamentals series this course is aimed at those who wish to gain confidence in all aspects of dentistry. The day revolves around the treatment of live patients with a balance of Veterinary Surgeons and highly experienced Equine Dental Technicians leading the teaching.

Small group practicals will allow all delegates to perform full dental treatments under the guidance of the course tutors. This course is aimed at practitioners looking to improve their knowledge and practical skills in the use of motorised dental equipment for routine rasping.

Avon Riding Centre,  
Kingsweston Road, Henbury,  
Bristol, BS10 7QT

BEVA Member £260  
Non Member £520

## Pre Course Learning

Pre course learning begins two weeks before the practical day.

## Key Learning Objectives

- Refresh your knowledge of the normal equine mouth and the common pathology found within the oral cavity
- Update your knowledge of the maintenance of the modern motorised dental units and their safe use
- Develop an effective method of oral examination
- Be confident in your approach to the routine motorised rasping of the horse's teeth
- Improve your technique using motorised equipment to correct more advanced pathology
